

HONDURAS

ANALYSIS OF THE STATE OF THE VIOLENCE AND CITIZEN SECURITY JANUARY TO DECEMBER 2022

HIGHLIGHTS

- 2022 closed with a general reduction in all crime with regard to 2021.
- Homicides decreased by 12.8% (506 fewer victims). This means 2022 had a homicide rate per 100,000 population of 35.8. That was the lowest in the last decade.
- The violent deaths of women registered a rate of six per 100,000 population, the lowest in the 2013–2022 period. Nonetheless, the reduction was lower than men, with women at 10% (33 fewer victims) and men 13% (470 fewer victims).
- Available information shows that 40% of homicides remain under investigation. This is a 17% rise in these cases.
- Homicides that are related to social conflict are down by 25.2% and those related to crime dropped 26.5%.
- Homicides of 18- to 30-year-olds decreased by 17.6% (278 fewer victims). However, this demographic segment is still the most affected by homicide (38% of the total).
- Firearms are still the primary weapon used in homicides in Honduras. Their use reached 77.3% of male deaths and 68.7% of female deaths.
- In 2022, 44 municipalities registered zero violent deaths by homicide.
- In 179 municipalities the number of homicides declined or were unchanged from 2021 to 2022.
- 104 municipalities show a rise in the number of homicides from 2021 to 2022.
- The reduction in homicides was registered primarily in urban areas with a 14.2% reduction (329 fewer victims).
- Deaths due to traffic accidents had the lowest decrease with 10 fewer victims (6% compared to 2021).
- In 59% of the cases of traffic-related deaths, these took place on Fridays through Sundays. Between 7:00 pm to 11:00 pm is when most (38%) of these deaths are registered.
- Suicides decreased by 21.5% with 120 fewer victims. Those most affected are men between 18 and 30 years of age.

EVIDENCE

In 2022, all offences decreased with regard to 2021: The number of homicides and suicides exhibited the steepest reduction at 12.8% (506 fewer victims) and 21.5% (118 fewer victims) respectively. For their part, road traffic accident-fatalities experienced a slight 0.3% downturn (six fewer victims).

Jan Feb Mar Apr May Jun Jul Aug Sep Oct Nov Dec

2022 closed with 1,374 cases under investigation. This is a 17% increase compared to 2021. The information to date shows that 45.3% were related to social conflict and other causes not attributable to organized crime. According to available information, incidences of social conflict decreased by 25.2% (524 fewer victims). Those due to crime fell 26.5% (182 fewer victims).

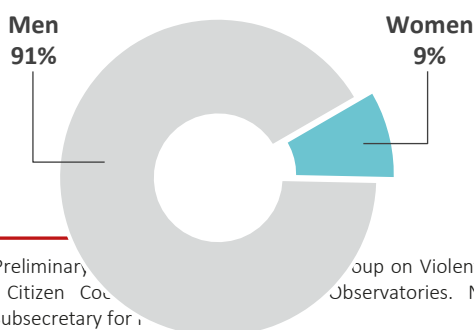

At the end of 2020, there was a high number of cases under investigation (1,374). Additionally, there was a notable 25% drop in homicides related to personal problems and quarrels (475 fewer victims). However, this is still high as compared to those related to robbery and gangs, which also exhibited a 23% drop.

In 2022, male homicides decreased by 13% (470 fewer victims). Violent deaths of women also decreased with a 10% drop (33 fewer victims), in comparison with 2021.

Although the percentage of both male and female homicides under investigation is high (40%), the records that are available show that a higher proportion of homicides are related to motives involving offenses due to social conflict, such as personal problems, quarrels, domestic violence, intrafamily violence, sports teams and fans

The proportion of homicide victims is higher among young people ages 18 to 30.

The number of homicide victims ages 18 to 30 decreased by 17.6% (278 fewer victims) with regard to 2021.

Registered homicides by age group 2022

Violent deaths in public spaces fell by 12.4% (438 fewer victims) and those that took place in the private sphere dropped by 16.5% (68 fewer victims). Even with the reduction of homicides in both public and private spheres, data continues to show that there are more female victims of violent death in the private sphere.
